

**BIL wheels, castors, aluminium modular hand and sack trucks, trolleys, carts, moving equipment and **

BIL Castors & Wheels Division has Group stock of over £2m of castors, wheels and materials handling equipment at our Calne headquarters – one of the largest assembly and stock facilities in the UK. We aim to deliver anything from lightweight furniture castors to ultra-heavy-duty fabricated industrial models of up to 11,500kg load capacity, within 24 hours, nationwide.

BIL manufacture a vast range of products that are tried and tested and have the facility to test in-house, where necessary, to BS EN 12527:1999 and 12528:1999 standards. As the preferred supplier to many companies throughout the UK, we are proud of our reputation as a manufacturer of innovative, quality solutions to meet the productivity and health and safety requirements of our customers.

BIL Materials Handling Division have supplied and developed a range of product handling equipment that has satisfied the needs of our customers for over thirty years. As manufacturers and owners of the SKOOTS® and AluTruk® brands we offer well-known and respected products that cover many materials handling applications.

# Ezee Lift

**Moving bulky items regularly over short distances suddenly became ezee...**

**Four pneumatic lifting castors  
 + Regulator  
 + Flow controls  
 + Switches, tubes and fixings  
 = EZEE LIFT KIT**

# Ezee Lift

product code EZ1

Ezee Lift has been independently certified by a recognised test laboratory for dynamic loads to limits specified as part of LOLER regulations

\*up to 750kg load

25mm stroke length

other castor options available

kit supplied without frame

## The castors

- Low level
- Hard-wearing polyurethane tyres
- Three-wheeled for extra stability
- High load capacity
- Excellent manoeuvrability

## The cylinders

- Stroke/rod length 25mm
- Compact and rugged construction
- Fully maintainable – internal replaceable seals
- Four bolt direct to cylinder fixing

## Flow controls

- Individual exhaust valves controlling drop speed
- Individual in-line inlet valves controlling raise speed
- Designed to handle uneven loads with ease
- Flow controls can all be set with locking nuts

## Tubing and fittings

- 25 metres of 6mm O/D tube supplied with each kit
- Tube made from long-lasting polyurethane
- Easy assembly with push-fit connections
- Twist-switch control for speedy operation
- Supplied with 10 bar single stage CO<sub>2</sub> regulator

The Ezee lift system is ideal for moving bulky and heavy objects, up to 750kg, over short distances especially if these movements are repetitive – in line with current Health & Safety and Manual Handling regulations.

As used by professionals from theatres, concert halls, storage facilities and exhibition halls. For any sort of bulky equipment, machinery or property movement on a regular basis in theatres or warehouses for example – especially where space is constricted.

**BIL supplies everything except the CO<sub>2</sub> bottle. A frame or fixings would need to be made to suit the load by the customer.**

**The system can be run off your compressed air supply provided 10 bar is not exceeded.**

**Ezee lift saves time and manpower and is very safe to use so long as guidelines are followed.**

Model	Cylinder plate L x W	Fixings centres	Height retracted	Height extended	Maximum load over four units
EZ1	102mm x 102mm	72mm x 72mm	174mm	199mm	750kg
